

# FAQ

## How did See Yourself IN begin?

**A:** The See Yourself IN public education program was started created by the Central Indiana Corporate Partnership (CICP) to help young people—particularly Gen Z students—access resources, learn about career opportunities, and explore the advanced industries that are driving Indiana’s economy.

## Is See Yourself IN a job board?

**A:** While we aren’t a job board, we are a network of resources educating young people about jobs, internships, and resources to help them live the life they want right here in Indiana. Our goal is to connect partners (that’s you!) with Gen Z Hoosiers who have an interest in your field.

## What industries does the See Yourself IN program focus on?

**A:** See Yourself IN is focused on Indiana’s advanced industries of the future such as advanced manufacturing and logistics, pharmaceuticals, animal and plant sciences, and technology, but we also have information on other areas. There are so many opportunities that our young people haven’t even heard of before. And we’re here to guide them to where they can see themselves thriving in Indiana.

## What kinds of opportunities can my students take advantage of?

**A:** We connect young people with training resources, external job and internship opportunities, apprenticeship programs, skill-building resources to help them thrive in a professional environment, and much more. We want to help Indiana’s young people realize their potential and find rewarding opportunities throughout the state—and we give them the tools to get there.
